Professional Summary

Computer Science and Engineering (AI & ML) undergraduate with hands-on experience in Artificial Intelligence, Machine Learning, Generative AI, Large Language Models (LLMs), Software Engineering, and Cloud Computing. Research Intern at the National Atmospheric Research Laboratory (NARL), ISRO, working with ERA5 atmospheric/reanalysis datasets and machine learning-based weather prediction. Experienced in developing Python-based AI applications, intelligent assistants, automation workflows, audio-analysis systems, and UPI fraud detection solutions.

Education

Mohan Babu University, Tirupati	2023–2027
B.Tech. in Computer Science and Engineering (AI & ML) CGPA: 8.53/10	
Sri Chaithanya College, Tirupati	2021–2023
Intermediate (MPC)	
Mathrusri E.M. High School, Thaathithopu	2021
SSC	

Technical Skills

Programming Languages	: Python, Java, JavaScript, SQL
Artificial Intelligence	: Artificial Intelligence, Machine Learning, Generative AI, Large Language Models (LLMs), Prompt Engineering
Web Technologies	: HTML5, CSS3, React.js, FastAPI
Databases	: MySQL, Relational Databases
AI & Development Tools	: Ollama, Groq API, OpenAI API, LangChain
Developer Tools	: Git, GitHub, Visual Studio Code
Core Concepts	: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Problem Solving, Data Analysis

Internship & Research Experience

Research Intern – National Atmospheric Research Laboratory (NARL), ISRO	July 2026 – Present
Tirupati, Andhra Pradesh	

- Develop and evaluate machine learning approaches for weather prediction using atmospheric and reanalysis datasets.
- Process and analyze ERA5 atmospheric/reanalysis datasets using Python for data preparation, exploratory analysis, and research support.
- Apply data analysis and machine learning techniques to identify patterns in atmospheric variables relevant to weather prediction.
- Contribute to data-driven atmospheric research through Python-based data-processing and predictive-modeling workflows.

Projects

Aura-Core Intelligent AI Assistant

- Architected a modular AI assistant integrating conversational AI, memory management, task automation, intelligent workflows, and context-aware interactions.
- Implemented the application using Python and FastAPI with modern AI models and API-based workflows for extensible AI capabilities.

AI Music Classifier

- Designed an AI-based music analysis system capable of recognizing musical notes and supporting intelligent music understanding.
- Utilized Python and machine learning techniques for audio processing and pattern recognition.

Edge-Based UPI Fraud Detection System

- Developed an AI-driven fraud detection system to analyze UPI transactions and identify suspicious activities in real time.
- Applied machine learning concepts to transaction security and intelligent financial risk assessment.

Certifications

- Introduction to Artificial Intelligence (AI) – [IBM](#)
- Supervised Machine Learning: Classification – [IBM](#)
- IBM Main Frame Developer – [IBM](#)
- Supervised Machine Learning: Regression – [IBM](#)
- Advanced Relational Database and SQL – [Coursera](#)
- AI Powered Marketer – [Semrush](#)

Leadership & Achievements

Coding Club Coordinator – Mohan Babu University: Coordinated coding initiatives, technical activities, competitive programming, and peer-learning opportunities.

Hackathon Coordinator – XHorizon: Supported planning and execution of the university's flagship hackathon, coordinating participants, volunteers, and event activities.

Event Organizer – Code2Mind: Organized an aptitude and coding challenge focused on logical reasoning, problem-solving, and student engagement.

Competitive Programming Participant – CodeFest 2026, IIT (BHU), Varanasi: Participated in a national-level competitive programming event and strengthened algorithmic problem-solving skills.
